

2020 HIGHEST RANKED WILDLIFE HABITAT BY ECOLOGICAL CONDITION

- Highest Ranked Habitat in New Hampshire
- Highest Ranked Habitat in Biological Region
Biological region = TNC ecoregional subsection for terrestrial habitats or Aquatic Resource Mitigation region for wetlands, floodplain forest.
- Supporting Landscapes
- Conservation or public land

Information about habitat condition was analyzed to develop a statewide and regional ranking and identify the highest quality habitat relative to all locations of a given habitat type in the state. The goal is to provide regional planners and conservation professionals a tool in identifying the most critical wildlife habitat locations. Results will be re-evaluated to monitor the effectiveness of conservation actions and respond appropriately to new information or changing conditions. Please refer to accompanying documents describing habitat mapping and condition. www.wildnh.com/wildlife/wap.html
